

Leaving, New & Coming Soon

Andrea Sawatzky
Pesticide Compliance Officer
Pesticide Compliance Program
Prairie (Alberta) Region
March 2023

Objectives

- How to find leaving, new & upcoming pesticides
 - Pesticide label database
 - Public Registry
 - Public consultations
 - Decisions and updates
- Examples of leaving, new & upcoming pesticides

The basics

- All pesticides in Canada must meet the requirements of the Pest Control Products Act (PCPA) and its regulations.
- Health Canada's PMRA consults with the public on all proposed major registration decisions, including **new** registrations, major **new uses** of a pesticide, re-evaluation and special reviews
- Re-evaluation of pesticides happens cyclically every 15 years
- Special reviews may be initiated at any time
- Special reviews differ from re-evaluation in that special reviews are intended to examine only specific aspects of a pc

PMRA Re-evaluation and Special Review Work Plan 2022-2027 (REV2022-01)

- Each spring, the PMRA publishes an updated Re-evaluation and Special Review Work Plan.
- Includes all ongoing re-evaluations and special reviews as well as new re-evaluations expected to be initiated in this time frame

<https://www.canada.ca/en/health-canada/services/consumer-product-safety/reports-publications/pesticides-pest-management/decisions-updates/reevaluation-note/2022/special-review-work-plan-2022-2027.html>

- This 5-year work plan may change in response to work load and to emerging issues that require priority action

Basis for Re-evaluation

- To ensure older pesticides that no longer meet modern standards are removed from the Canadian market and the use instructions on product labels are updated to best protect:
 - users,
 - bystanders,
 - environment
- Under current legislation, all pesticides will be re-evaluated on a 15-year cycle.

Leaving ... leaving ... gone

- Health Canada's label search indicates there are 12051 historical products

Number of records found = 12051

Label search results

Registration Number	Registrant Name	Product Name	Registration Status
34	STANCHEM INC.	STANCHEM FORMALDEHYDE SN SEED TREATMENT	HISTORICAL
106	WATKINS INC.*	WATKINS INSECT DUST	HISTORICAL
109	SAVOLITE MANUFACTURING LTD.	FAIRVIEW GOPHER-COP LIQUID RODENTICIDE	HISTORICAL
179	SURE-GRO IP INC.*	META SLUG & SNAIL KILLER BAIT	HISTORICAL
375		MOUSE & RAT POISON	HISTORICAL

Policy on Cancellation/Amendments

- Regulatory Proposal PRO2016-04 *Management of Pesticide Re-evaluation Policy*
- Phase-out timeline for **cancellation** of pesticides that don't meet modern standards for health &/ or environmental protection:
 - Last date of sale by registrant 1 year
 - Last date of sale by retail 1 year
 - Last date of permitted use 1 year
- Users usually have up to **3 years** following the re-evaluation decision to cancel
- Up to **2 years** for amendments (label changes)

<https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/consultations/regulatory-proposals/2016/policy-cancellations-amendments-following-evaluation-special-review/document.html>

New and Coming Soon

Health Canada's Public Registry is the place to go.

- **Coming soon = Proposed Registration Decision (PRD)**
- **New = Registration Decision (RD)**
- Label changes coming soon = Proposed Re-evaluation Decision (PRVD)
- New label changes = Re-evaluation Decision (RVD)
- New minor uses added = User Requested Minor Use Label Expansion (URMULE)

Potassium Chloride & Potash Molluscide

- RD2022-07 (30 June 2022)
- For control of zebra & quagga mussels in water reservoirs and other water bodies as well as water in pipelines and closed systems, including fire suppression systems in hydroelectric plants
- Under approved conditions of use, the health and environmental risks and the value of the pcps are acceptable
- Potash Molluscide, PCP 34466
- <https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/consultations/proposed-registration-decisions/2022/potassium-chloride-potash-molluscicide/document.html>

Imazapyr

- RD2021-03 (15 March 2021)
- To control certain invasive plants that grow in and around aquatic sites
- At the time PRD2020-17 was published (18 December 2020), Imazapyr was registered for control of weeds to non-cropland sites and in imazapyr tolerant canola and lentil crops
- Habitat Aqua, PCP 32374
- <https://www.canada.ca/en/health-canada/services/consumer-product-safety/reports-publications/pesticides-pest-management/decisions-updates/registration-decision/2021/imazapyr-habitat-aqua.html>

Newest pesticide a.i ... Pyriproxyfen

- Pyriproxyfen & Pyriproxyfen 20SC Insecticide
- RD2023-03 (13 February 2023)
- control of aphids and whiteflies in greenhouse vegetables and greenhouse herbaceous and woody deciduous ornamentals
- Not yet listed in the data base
